

Wagner College Wireless Setup for Windows XP, Vista and Windows 7

Download the Windows client from www.wagner.edu/infotech/wireless and follow the instructions below.

1. Double click the file you just downloaded, **wagner_wireless.msi**. Windows Vista and Windows 7 will ask you for confirmation. Click **“Accept”** or **“Allow”**. The file will proceed with the installation.
2. If you are using Windows XP, when the installation is finished you will be prompted to restart your computer. Click **Yes** and your computer will be restarted. If you are using Windows Vista or Windows 7, no restart is required, continue to step 3 immediately.
3. To setup your account information, click the pop up balloon in the bottom right corner.

4. The following window appears. Enter your All Access Pass credentials. The Domain field should be left blank. Make sure the check box next to **Save User Credentials** is checked, and then click **OK**.

A screenshot of the "SecureW2 Credentials" dialog box. The dialog box has a red header with the "SecureW2" logo. Below the header, it says "Please enter your credentials:". There are three input fields: "Username:", "Password:", and "Domain:". The "Domain:" field is empty. Below the input fields, there is a checkbox labeled "Save user credentials" which is checked. At the bottom of the dialog box, there are "OK" and "Cancel" buttons.

You are done! If you have any questions, please call Technical Support at extension **3410**.
