COURSE DESCRIPTION

Client/Server Programming in Visual Basic 6.0

We will have a course in Visual Basic that would incorporate Client/Server Programming. Students will get an insight of making COM/DCOM dll's that reside on the sever and communitie with the client and the database. They will also get knowledge of 3 Tier Programming. Studtents will make Active X dll's that will be deployed on the server and used byt the clients (students), they will also get brief knowledge of Database Programming in SQL. Programming for client code and Active X dll's will be accomplished using Visual Basic and the Database used will be Microsoft SQL.
